System and Unit Test Report
FitTrak
Trainers
11/30/2019

From Sprint 1, User Story #3: As a user, I want to have a functional user interface that allows me to be able to use all the features of the app.

From Sprint 2, User Story #2: As a user (Personal Trainer), I want to be able to properly communicate and interact with my clients (including private workout appointment scheduling functionality)

From Sprint 3, User Story #1: As a user, I want a polished trainer/client experience that I can access on web or Android

From Sprint 4, User Story #1: As a team member I want to seamlessly connect the user and the trainer

SCENARIO:

1. Open FitTrak on your web browser
2. Click Sign Up
3. Sign up as a Trainer by filling in the required fields (email and password)
4. Upon successful Trainer registration, the Trainer User will be redirected to the Landing Page
5. To complete sign up, hit the "Settings" option displayed on the dashboard
6. Once in settings, click Make Profile and fill in all required fields as follows
    a. **First Name (String) - Denotes a Trainer's first name**
    b. **Last Name (String) - Denotes a Trainer's last name**
    c. **About Me(String/text) - Denotes a Trainer's interests, hobbies, and specialties**
    d. **Age(Integer) - Denotes Trainer's age**
    e. **Gender(String) - Denotes Trainer's respective gender and/or sexual orientation**
    f. **Experience (Integer) - Denotes years of experience as a trainer**
7. Upon successful registration, Trainer user will then arrive to a preview
8. Once selecting the "back" option, users are redirected to Settings page with an updated view of the information inputted with three given options
    a. Destroy/Create are there so that if a user wants to create another portfolio, then it is possible to create another portfolio
    b. Edit allows for Trainers to be able to edit their respective portfolios
9. To get back to the index, Trainer Users can hit the top right "Home" button
    a. To view/assign workouts to their clients, Trainer Users can hit the "Workouts" option on the dashboard **after creating a Trainer profile**
        i. Once on the "Workouts" page, if the User has any existing workouts, they will be displayed, otherwise, none will be displayed

1. Also on this page, Trainer Users can click “Click To Make A New Workout” to create a new workout
2. Once clicking this option, the user is prompted to create a New Workout by filling in the fields **Workout name(String)** and **Description(String)**
3. Once a user clicks “Create Workout”, this workout will be displayed from the index “Workouts Page”.
4. This will also be displayed on the user’s android application

b. To view their respective clients, Trainer Users can click on the “Clients” option on the dashboard. **Clients can only enroll AFTER creating a Trainer Profile**

c. To view/assign appointments with their clients, Trainer Users can hit the “appointments” option. “Appointments” can only be assigned **after creating a Trainer profile**

   i. Once on the appointments page, if the User has any existing appointments, they will be displayed. If a Trainer wants to create an appointment with their clients, Trainers can click on the “New Appointment” option

1. Once on the “New appointment” option, the user is prompted to fill in the fields **Client Username(string) , Date (String), and Start Time (String)** of the respective appointment
2. Once all the fields have been filled. Trainers can click “Create Appointment” where they will be redirected to a preview of that assignment
3. Click the “Back” button and users will be redirected to the initial appointments page where the newly created appointment will be displayed
4. This is also displayed on the client’s Android application
